DETAILED LANGUAGE

Retroactive PDA Change

CenterPoint Energy Services, Inc. ("CES"), MRT's affiliate with marketing function employees, is requesting a retroactive Predetermined Allocation change. MRT's tariff, Section 7.13, states that the party providing point confirmations should submit a Predetermined Allocation ("PDA") prior to gas flow. Beginning 1/1/2019, the CERC delivery meter 805533 was split into two meters. 805533 for Field delivery and 805546 Market delivery. When submitting PDA changes for 1/1/2019, CES did not include the new meter. As confirming party, CES is requesting MRT allow the allocations to be updated 1/1/2019 forward to keep all contracts as nominated with the swing on 5587. Pursuant to Section 29.1 GT&C, MRT will waive the prospective nomination requirement of Section 8.1 (f), G T & C. No other customers, nor MRT, are adversely affected by this waiver.
